EXPERIENCE

Blockster — *JavaScript Developer*

dec 2021 - feb 2022

- * Implemented the algorithm to find incorrectly translated words that helped to save time inspectors.
- * Organized the approach to the development of universal components for use to different applications.
- * Implemented strict standards for designers and front-end developers helped to reduce time.
- * Have used following stack of technologies: TypeScript, JavaScript, React, NodeJS, Webpack

SUMMARY

At the moment I study programming every day and I am not going to stop. Since the very beginning of my journey, I have used and still use typescript for the development of web and microservice architectures. I know how to negotiate and keep everything under control

SKILLS

JavaScript - 3 years

TypeScript - 2 years
